

Heelerns ursprungslinjer

Den största delen av hela världens Heelerkullar föds i England, Sverige eller i Finland. I nedanstående lista finns en förteckning över hundar i hanhundslinjer respektive tiklinjer använda i avel i ovanstående länder. De finska och de engelska siffrorna gäller från 2010-2019 men de bearbetas och kommer att uppdateras senare. De svenska siffrorna är bearbetade från år 2010 fram till år 2025.

Den största delen av världens Heeler kullar föds i England, Sverige eller Finland. I detta dokument återfinns de olika hanar och tikar som använts till avel i de olika hanhunds- och tiklinjerna. Bakom våra Lancashire Heeler av idag finns 7 hanar och 11 tikar, de linjer av Lancashire Heeler som grundade vår ras. Det finns även någon inmönstrad hund vars bakgrund inte är känd. Vår ras är liten och den samlade genpoolen likaså.
